Dear colleagues

It is a great pleasure to welcome you to the 15th International Facial Nerve Symposium, which will be held in the beautiful city of Madrid in September 24-27th 2025 (IFNS 2025).

We are thrilled to announce that this upcoming symposium, supported by the Sir Charles Bell Society, promises to be a landmark event that will provide an exceptional platform for deepening our understanding of facial nerve disorders, diagnosis, and treatment modalities. Over four days, we will cover a wide range of topics related to facial paralysis, from fundamental principles to cutting-edge advancements.

The conference program will feature selected oral presentations and posters structured into panels, along with video surgical presentations, keynote lectures, and hands-on sessions. For younger physicians and residents, there will be a specific junior's path as well as mentor sessions with experienced facial nerve experts.

The invaluable expertise of the Facial Paralysis Unit at La Paz University Hospital in Madrid, with 23 years of experience in treating complex cases, plays a pivotal role in shaping this event, which will culminate in the Pre-congress Workshop (7TH International Course. An Update on Facial Paralysis).

Beyond the intellectually stimulating sessions, we encourage you to immerse yourself in the vibrant culture and rich heritage of Madrid. The city's historical landmarks, art, cuisine, and warm hospitality promise an unforgettable experience.

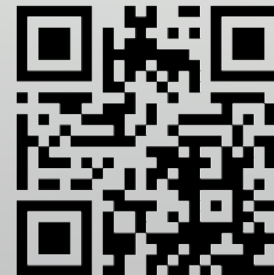

Thank you for considering our invitation. We look forward to welcoming you to Madrid and creating a symposium that will not only contribute to advancements in our field but also create lifelong connections and friendships.

Warm regards,
Luis Lassaletta & Javier Gavilán

TEAMWORK: LEADING TO EXCELLENCE IN FACIAL FUNCTION

Main Topics

- **Nerve Regeneration and Imaging**
- **Bell's Palsy and Acute Facial Paralysis**
- **Otology and Skull Base Surgery**
- **Neurophysiology and Monitoring**
- **Facial Reanimation Procedures**
- **Esthetic procedures in facial paralysis**
- **Grading and Documentation of Facial Function**
- **Management of Facial Synkinesis**
- **Oculoplastic Surgery and Eyecare in Facial Paralysis**
- **Quality of Life and Psychological Impact**
- **Future Technologies and Innovations**
