Multiplier event ICT guides

Madrid April 10th 2018

Erasmus+

This project is funded by
the European Union

Where it all began...

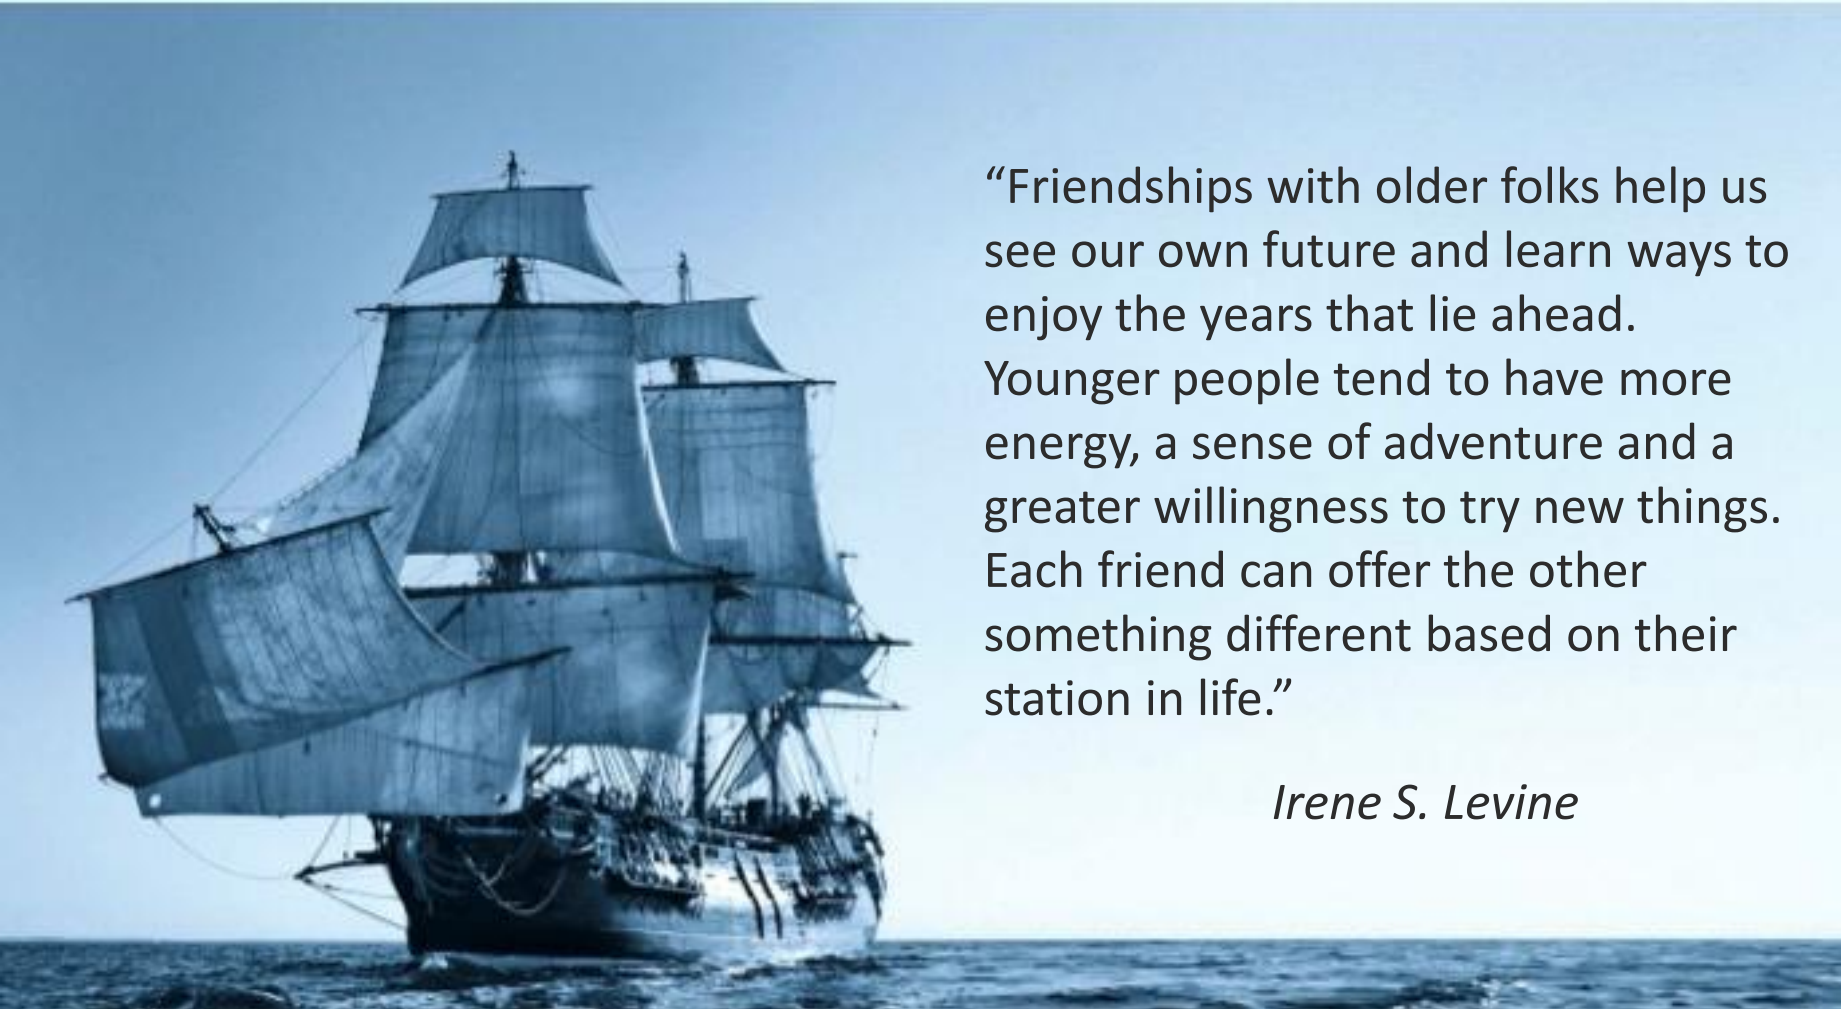

Project GOALS for pupils (12-16 year olds)

- Lower risk for future ESL
- Increased self-confidence, motivation for education and increased sense of empowerment in life
- Increased acquisition of the key competencies language and communication (oral and written)
- Lower risk for local gang recruitment

Project GOALS for seniors

- Increased capacity to use smart tablets
- Increased sense of capacity to handle modern technology and sense of access to public services and information
- Increased sense of security in the local area
- Increased sense of lifelong learning accessibility

Intergenerational learning

“Friendships with older folks help us see our own future and learn ways to enjoy the years that lie ahead. Younger people tend to have more energy, a sense of adventure and a greater willingness to try new things. Each friend can offer the other something different based on their station in life.”

Irene S. Levine

I'm looking forward to an
exciting day!
