Turtle very close to dying

After looking at the picture you probably think it is not possible, but it is true. This has happened in a little town in Thailand, where there is a fountain full of turtles.

Veterinarians in this area were shocked! It took several hours and a lot of patience to remove more than 900 coins from the stomach and intestines of one of the turtles. She weighed around five kilograms and it was very hard for her to move.

Bank (the turtle's name) was in terrible pain when veterinarians removed all of the coins. She ate them because tourists liked to throw coins into the water for good luck.

Veterinarians couldn't believe that the 25-year-old turtle could survive. She was very close to dying because she couldn't eat or defecate.

After a 4-hour surgery, the turtle was OK but they had to wait until she had completely recovered. During the next two weeks she could only eat puree and drink water. Once she was fine, they returned her to the ocean again.

The Police has put up different road signs where tossing coins into the water is completely forbidden and if you do, you could get a ticket.

Read the text carefully and answer the questions.
